

PARKINGPOINT

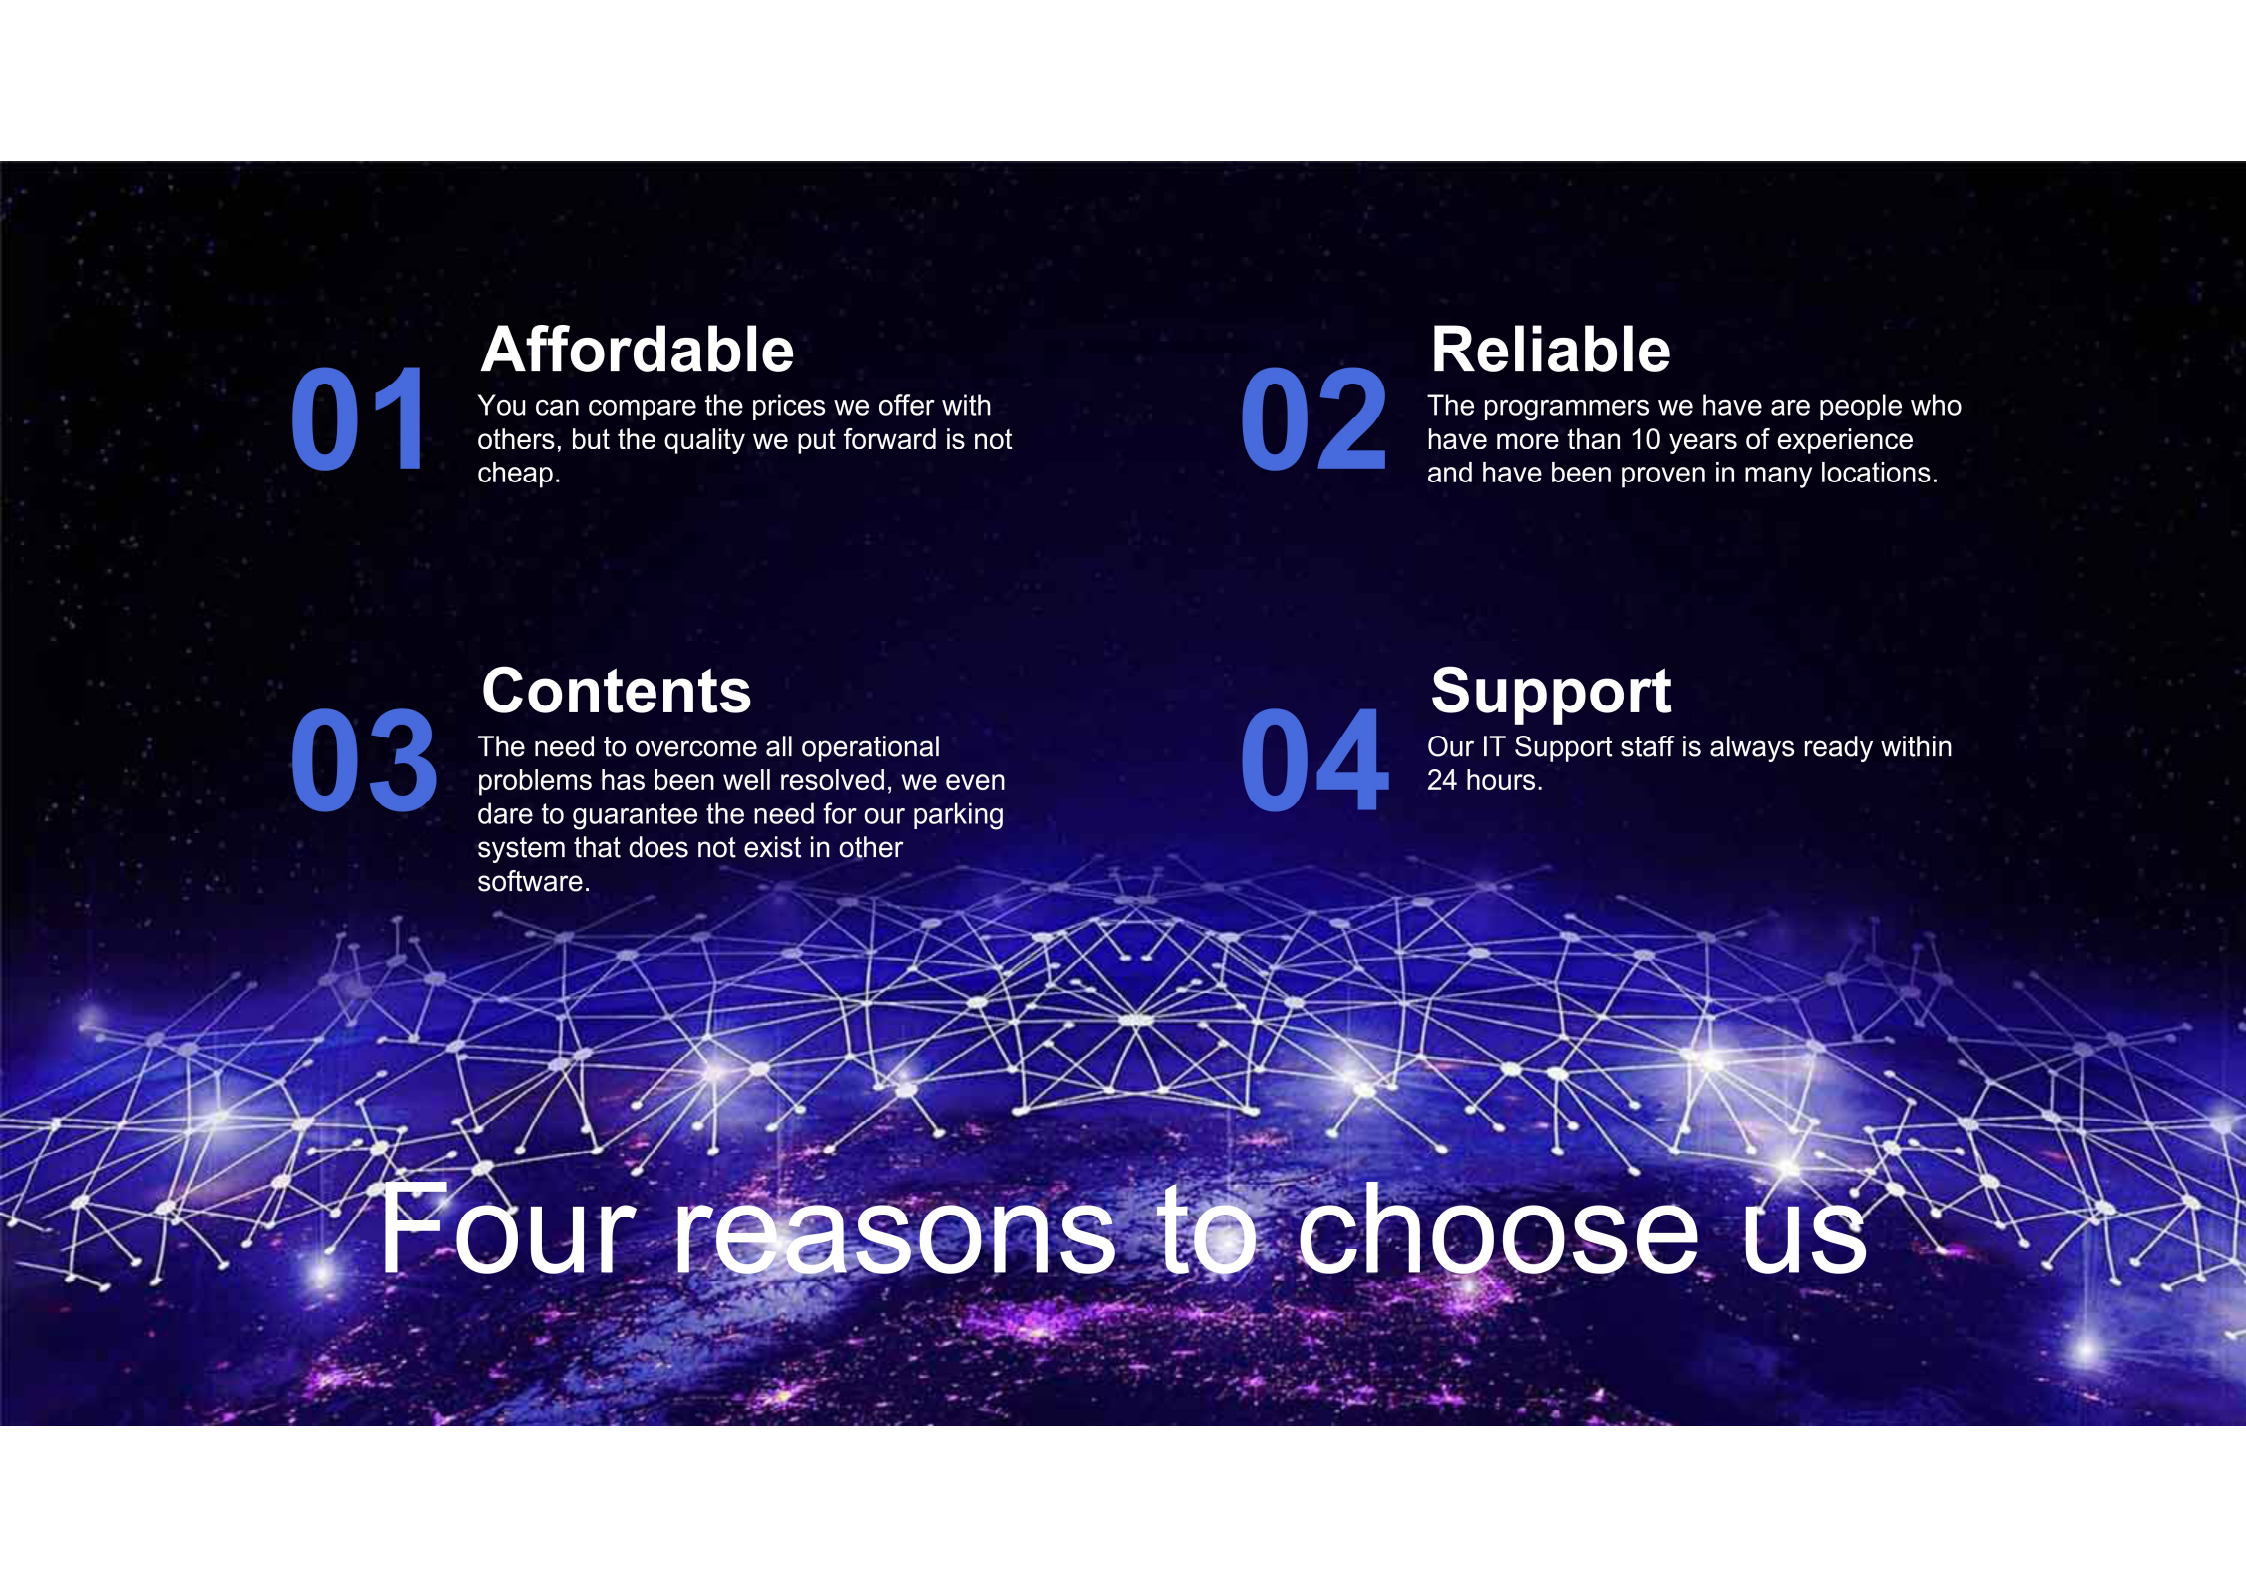

Present by Toko Parkir

ParkingPoint

Easy solution for your parking problem

01

Affordable

You can compare the prices we offer with others, but the quality we put forward is not cheap.

02

Reliable

The programmers we have are people who have more than 10 years of experience and have been proven in many locations.

03

Contents

The need to overcome all operational problems has been well resolved, we even dare to guarantee the need for our parking system that does not exist in other software.

04

Support

Our IT Support staff is always ready within 24 hours.

Four reasons to choose us

ParkingPoint Product

This is our product that we created to meet the needs of parking software for now and in the future

Gate In

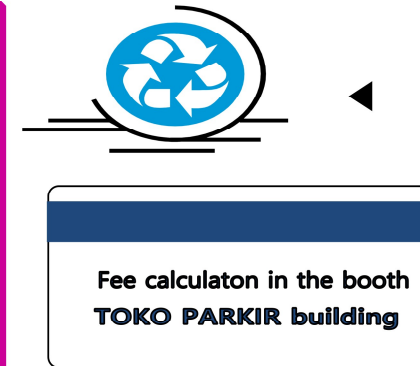

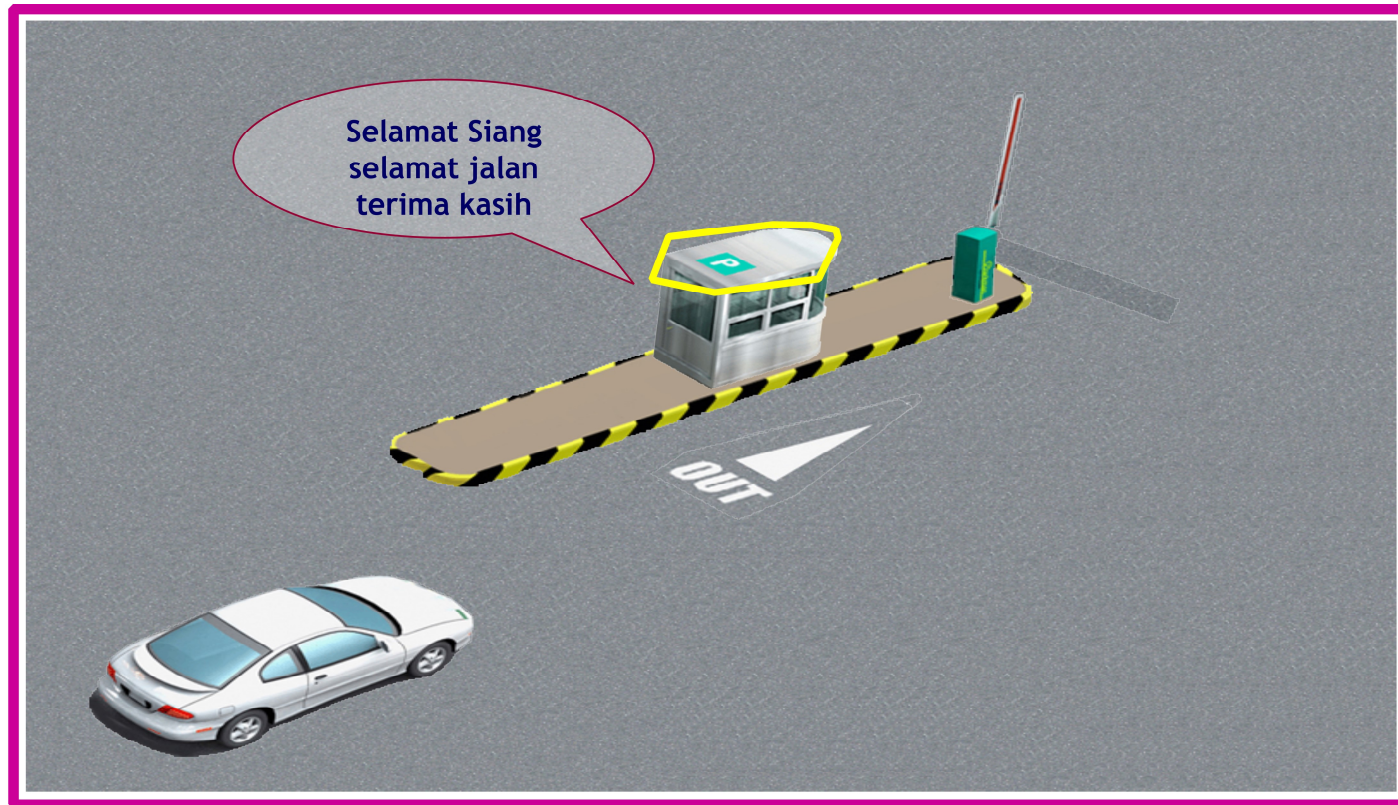

- ✓ The driver approaches the Entrance and stops right next to the Entrance Dispenser
- ✓ The vehicle entrance ticket is taken from the ticket dispenser after pressing the green button, the number plate data is entered into the system via image capture
- ✓ After that, if you have printed the receipt, the Barrier Gate will open and the vehicle can enter the parking area
- ✓ The barrier gate will close automatically after the vehicle passes through the loop detector and indicates that a new transaction is ready to start
- ✓ Emergency when the ticket dispenser is jammed can call the officer via the emergency button
- ✓ If the vehicle breaks down under the barrier gate or has not passed through the barrier gate the parking barrier will not override or close as a safety through the use of a safety inductive loop

Information retrieved at the entrance (plate number, time of entry, vehicle image capture) our system guarantees data transferring to the management server

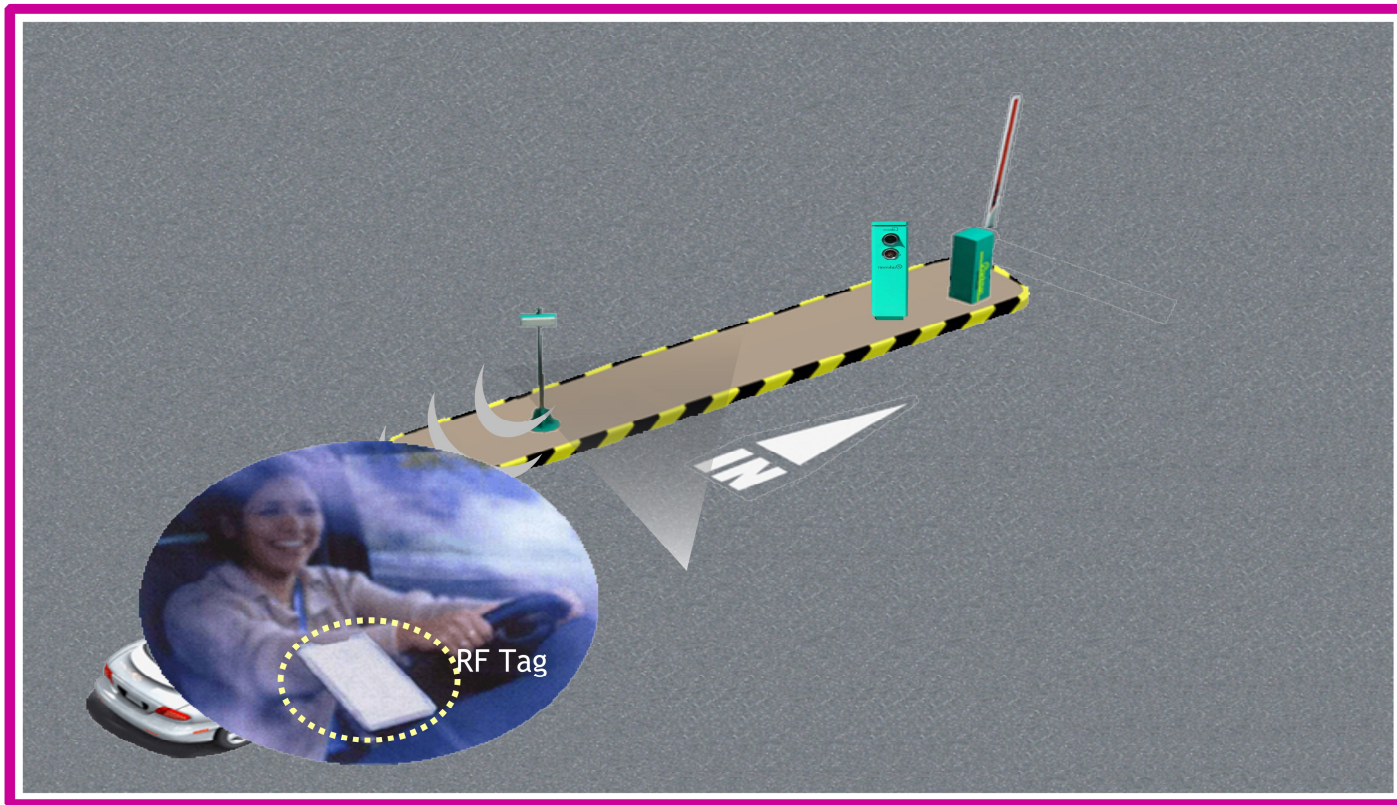

Exit Gate

At the exit gate, the Guest or Invited will be asked to submit a parking ticket
parking tickets will be scanned on a barcode reader, then on the computer screen will display data from visitors.
If it matches then the barrier gate will be opened. parking ticket is taken by the officer

95%

We believe this system can be used by employees over 50 years old.

Login Style

A screenshot of a 'ParkingPoint Login' dialog box. The dialog has a title bar with a close button (x) and the text 'ParkingPoint Login'. Inside, on the left, is a circular logo with a stylized 'P' and a blue bar. To the right of the logo are two input fields: 'Username' with a single character 'l' and 'Password' which is empty. Below the password field is the text 'v0.8.6-nux'. At the bottom right is a 'Login' button.
